EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

Laboratory contact details Anses Plant Health Laboratory - Nematology, Unit Domaine de la Motte au Viconte BP 35327, 35653 Le Rheu, France Short description of the test Detection of Bursaphelenchus xylophilus using LAMP test developped by Kikuchi et al. in extracts from wood chips or on isolated nematodes Date, reference of the validation report Validation process according to EPPO standard PM7/98? Is the lab accredited for this test? No Was the validated data generated in the framework of a project? If yes, please specify VALITEST Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? PPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Visuanie al. 2009 Is the test modified compared to the reference test Kit Leich and Molecular used (FAM dye) for the detection of the reference test Kit Leich and Molecular publication				
LAMP test developped by Kikuchi et al. in extracts from wood chips or on isolated nematodes Date, reference of the validation report Validation process according to EPPO Standard PM7/98? Is the lab accredited for this test? No Was the validated data generated in the framework of a project? If yes, please specify VALITEST Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / Identification Method(s) Molecular LAMP Method: Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol Portocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. in extracts from wood on in solated in extracts from wood in the eraction insted of color changes in the original publication Kit	Laboratory contact details	Domaine de la Motte au Viconte BP 35327, 35653		
Validation process according to EPPO Standard PM7/98? Is the lab accredited for this test? No Was the validated data generated in the framework of a project? If yes, please specify VALITEST Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protoc	Short description of the test	LAMP test developped by Kikuchi et al. in extracts		
Is the lab accredited for this test? Is the lab accredited for this test? Was the validated data generated in the framework of a project? If yes, please specify VALITEST Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol? New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the original publication instee of color changes in the original publication Kit	Date, reference of the validation report	2019-12-10 - Bx1		
Was the validated data generated in the framework of a project? If yes, please specify Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? Kilkuchi et al. 2009 Is the test modified compared to the reaction insted of color changes in the original publication Kit		yes		
If yes, please specify Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification detection Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic yes ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the original publication Kit	Is the lab accredited for this test?	no		
Description of the test Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic yes IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit		Other_project		
Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit	If yes, please specify	VALITEST		
Organism(s) Bursaphelenchus xylophilus (BURSXY) Detection / identification Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit				
Detection / identification detection Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit	Description of the test			
Detection / identification detection Method(s) Molecular LAMP Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit				
Method(s) Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 yes fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication Kit	Organism(s)	Bursaphelenchus xylophilus (BURSXY)		
Method: Molecular LAMP Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit	Detection / identification	detection		
Reference of the test description As or adapted from an EPPO diagnostic protocol New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol? IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit	Method(s)	Molecular LAMP		
As or adapted from an EPPO diagnostic protocol? New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol yes IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit Kit	Method: Molecular LAMP			
New test being considered for inclusion in the next version of the EPPO diagnostic protocol? As or adapted from an IPPC diagnostic protocol IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Kit	Reference of the test description			
As or adapted from an IPPC diagnostic protocol IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 yes fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication Kit		no		
IPPC diagnostic Protocol name ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016) Name of the test Kikuchi et al. 2009 Is the test modified compared to the reference test Ves fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication Kit		yes		
xylophilus (version 2016) Name of the test Kikuchi et al. 2009 yes fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication Kit	-	yes		
Is the test modified compared to the reference test yes fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication Kit	IPPC diagnostic Protocol name	·		
reference test of the reaction insted of color changes in the original publication Kit	Name of the test	Kikuchi et al. 2009		
	•	of the reaction insted of color changes in the		
	Kit			
Is a kit used no	Is a kit used	no		

Other information				
Other details on the test	LAMP amplification performed with the following kit; OPTIGENE - Isothermal master mix ISO-004.			
Performance Criteria :				
Organism 1.:	Bursaphelenchus xylophilus(BURSXY)			
Analytical sensitivity				
What is smallest amount of target that can be detected reliably?	1 individual			
Diagnostic sensitivity				
Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	100%			
Standard test(s)	Comparison with samples of known status			
Analytical specificity - inclusivity				
Number of strains/populations of target organisms tested	5 populations of B. xylophilus included (originated from China, Portugal and Canada)			
Specificity value	100%			
Analytical specificity - exclusivity				
Number of non-target organisms tested	19 populations of the following species included: B. macromucronatus, B. doui, B. hoffmani, B. kolymensis, B. mucronatus, B. sexdentati, B. vallesianus, B. willibaldi, B. sp.			
Specificity value	100%			
Diagnostic Specificity				
Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	not applicable			
Reproducibility				
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	100%			
Repeatability				
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	100% (from 8 replicates of DNA solution)			
Test performance study				
Test performance study?	no			
Other information				
Any other information considered useful	Data obtained in the framework of the VALITEST project, during the preliminary study's phase, prior to the TPS and in a sole laboratory.
