## EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

Laboratory contact details	Anses Plant Health Laboratory - Nematology Unit Domaine de la Motte au Viconte BP 35327, 35653 Le Rheu, France
Short description of the test	Morphological identification of Bursaphelenchus xylophilus
Date, reference of the validation report	2011-05-01 - Evaluation de la méthode d'identification morphologique de Bursaphelenchus xylophilus
Validation process according to EPPO Standard PM7/98?	yes
Is the lab accredited for this test?	no
Was the validated data generated in the framework of a project?	
Description of the test	
Organism(s)	Bursaphelenchus xylophilus (BURSXY)
Detection / identification	identification
Method(s)	Morphological
Method: Morphological	
Reference of the test description	
As or adapted from an EPPO diagnostic protocol	yes
EPPO Diagnostic Protocol name	PM 7/004 Bursaphelenchus xylophilus (version 2)
Is the test modified compared to the reference test	yes Modified see full report
Other information	
Other details on the test	Table 2
Are the performance characteristics included in the EPPO diagnostic protocol?	no
Performance Criteria :	
Organism 1.:	Bursaphelenchus xylophilus(BURSXY)
<u>Analytical sensitivity</u>	
What is smallest amount of target that can be detected reliably?	2 nematodes (1 male and 1 female)

Diagnostic sensitivity	
Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	Not evaluated
Standard test(s)	Not relevant
Analytical specificity - inclusivity	
Number of strains/populations of target organisms tested	2 populations of Bursaphelenchus xylophilus
Specificity value	1
Analytical specificity - exclusivity	
Number of non-target organisms tested	1 population of non target species: B. sexdentati (target= xylophilus group) 6 non target populations (target=B. xylophilus): B. doui, B. macromucronatus, B.fraudulentus, B. singaporensis, B. mucronatus european type, B. mucronatus asian type
Specificity value	
Diagnostic Specificity	
Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	Not evaluated
Reproducibility	
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	100% (30 slides , 2 operators)
Repeatability	
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	100 % at group identification level 100% at species identification level
Test performance study	
Test performance study?	no
Other information	
Any other information considered useful	The full report is available upon request to the laboratory
